Default UI — Dock bar

Any surface docks out of the transcript into a shelf on the composer and opens from there as a window, one at a time. When the row is full, the oldest stack into a pile. Inverted ink means open; amber still means waiting on you.

Wide · two docked, one open

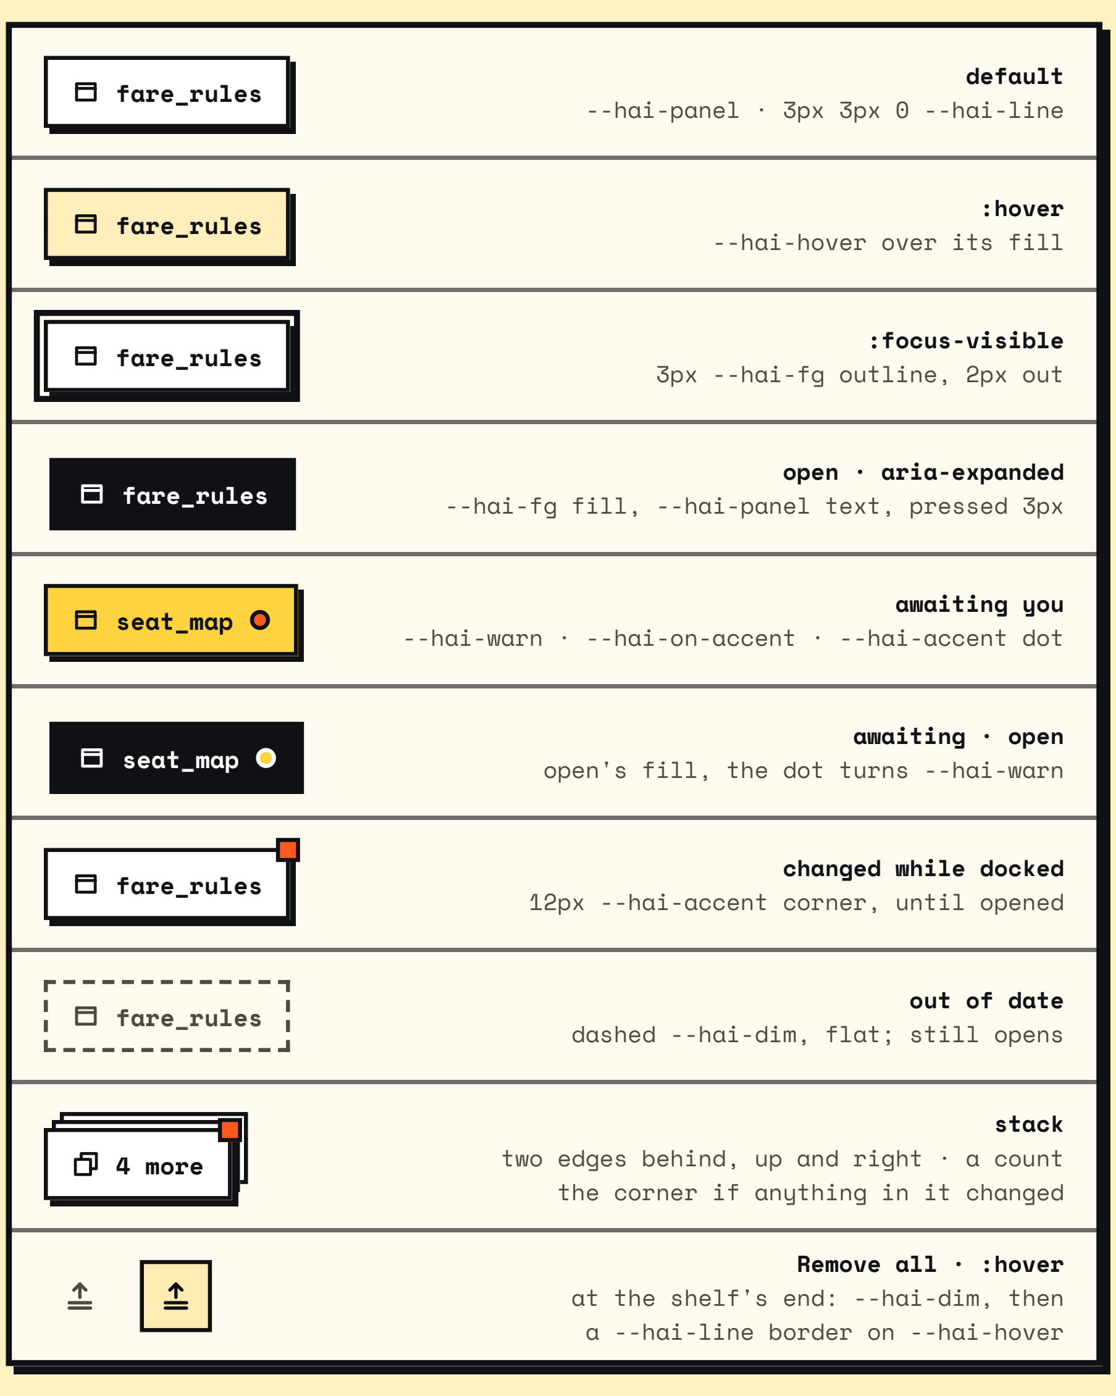
Anatomy & states

@haikit/client · hai.css · issue #72

Dock bar — anatomy & states

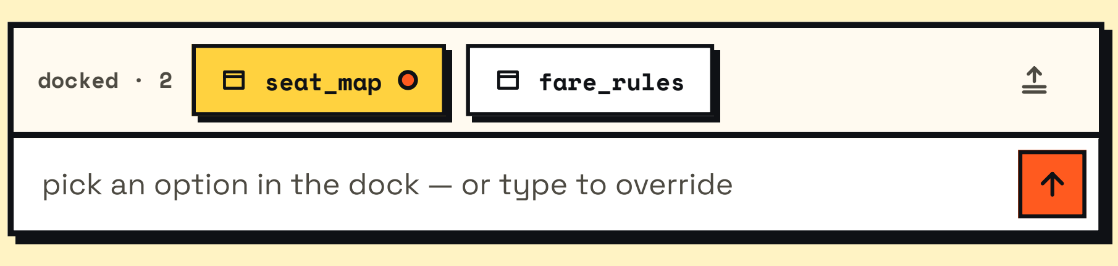
A surface docks out of the transcript into a shelf on the composer, and opens from there as a window. When the row is full, the oldest stack into a pile. Inverted ink means open; amber still means waiting on you. No new tokens.

Dock items



Item	State	Rendering
fare_rules	default	--hai-panel · 3px 3px 0 --hai-line
fare_rules	:hover	--hai-hover over its fill
fare_rules	:focus-visible	3px --hai-fg outline, 2px out
fare_rules	open · aria-expanded	--hai-fg fill, --hai-panel text, pressed 3px
seat_map	awaiting you	--hai-warn · --hai-on-accent · --hai-accent dot
seat_map	awaiting · open	open's fill, the dot turns --hai-warn
fare_rules	changed while docked	12px --hai-accent corner, until opened
fare_rules	out of date	dashed --hai-dim, flat; still opens
4 more	stack	two edges behind, up and right · a count the corner if anything in it changed
	Remove all · :hover	at the shelf's end: --hai-dim, then a --hai-line border on --hai-hover

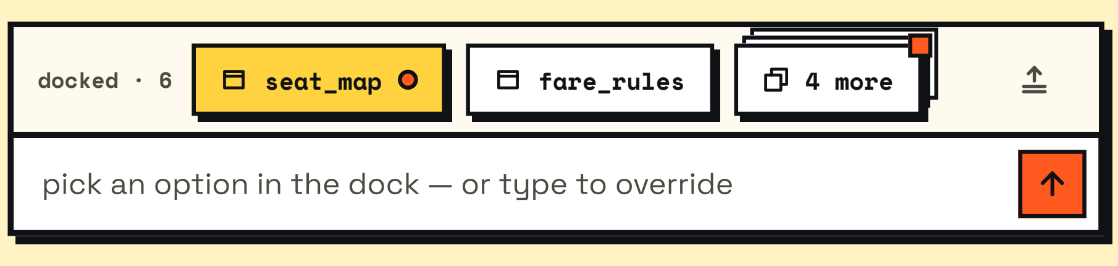
The shelf, on the composer



docked · 2 — seat_map ● — fare_rules

pick an option in the dock — or type to override

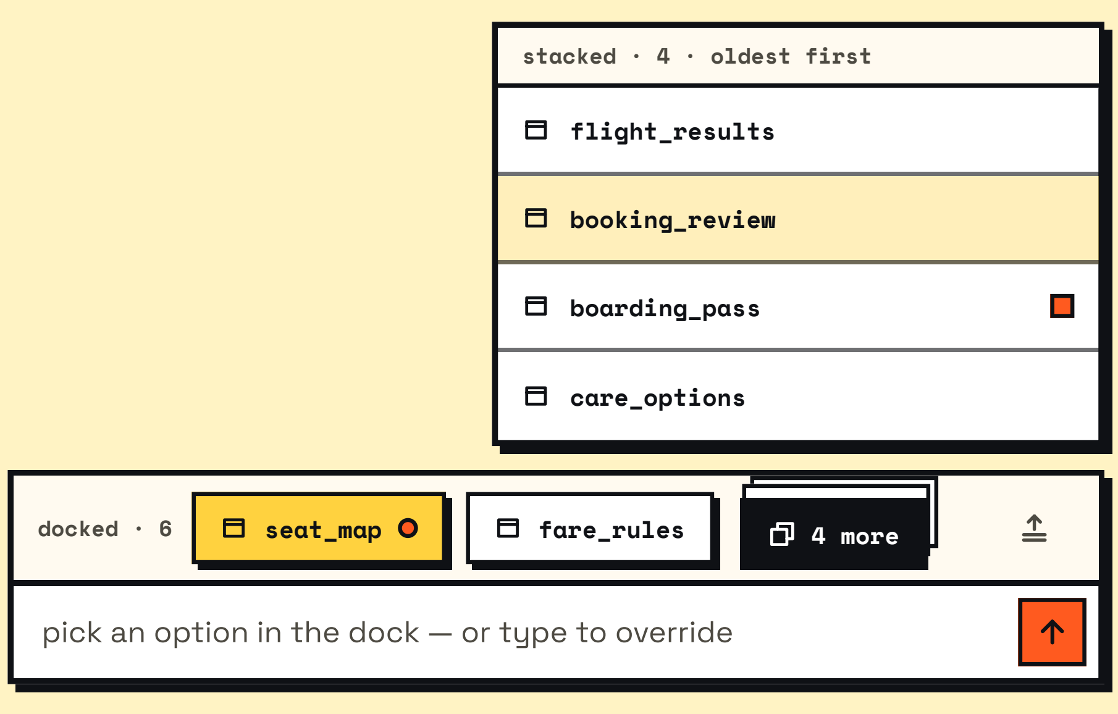
The shelf is the composer card's top row: --hai-panel-2, a 3px rule under it, one shadow for both. Items in docking order, newest last; at its end, Remove all puts every docked surface back in the chat.



docked · 6 — seat_map ● — fare_rules — 4 more

pick an option in the dock — or type to override

No room for the next one: the oldest stack into one pile at the end of the row, with a count. A surface waiting on you never stacks. The pile wears the accent corner while anything in it has changed.



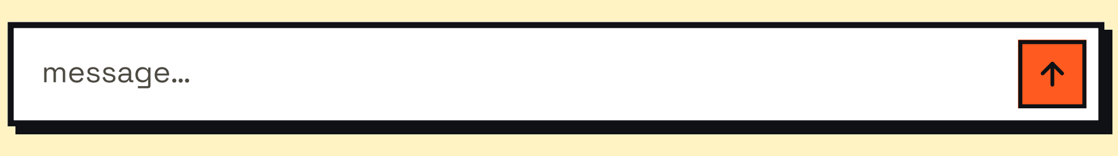
stacked · 4 · oldest first

- flight_results
- booking_review
- boarding_pass
- care_options

docked · 6 — seat_map ● — fare_rules — 4 more

pick an option in the dock — or type to override

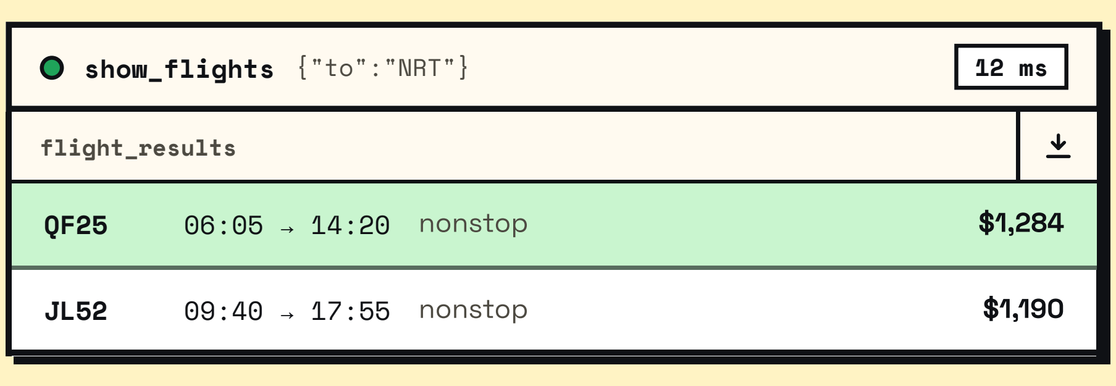
Open, the pile lists what's in it, oldest first, above the shelf. Picking one opens its window and brings it into the row; the row's oldest takes its place in the pile. Escape, or a click outside, closes the list.



message…

Nothing docked: no shelf. It appears with the first surface docked and goes with the last.

On a surface

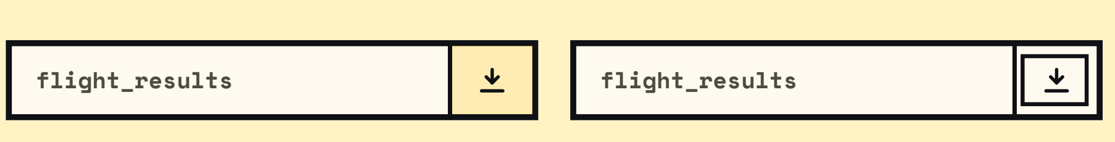


show_flights {"to":"NRT"} — 12 ms

flight_results

QF25	06:05 → 14:20	nonstop	$1,284
JL52	09:40 → 17:55	nonstop	$1,190

Every surface gets a 34px bar: its component name, and Dock, an icon in a 40px cell named for screen readers and in a tooltip. The same bar is the window's title bar.

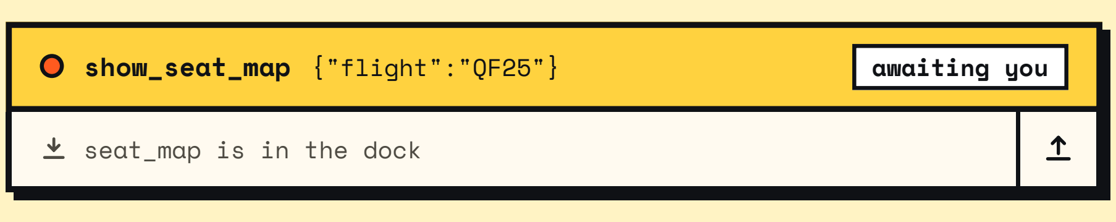


flight_results

Dock :hover · --hai-hover

flight_results

Dock :focus-visible · 2px inside the bar

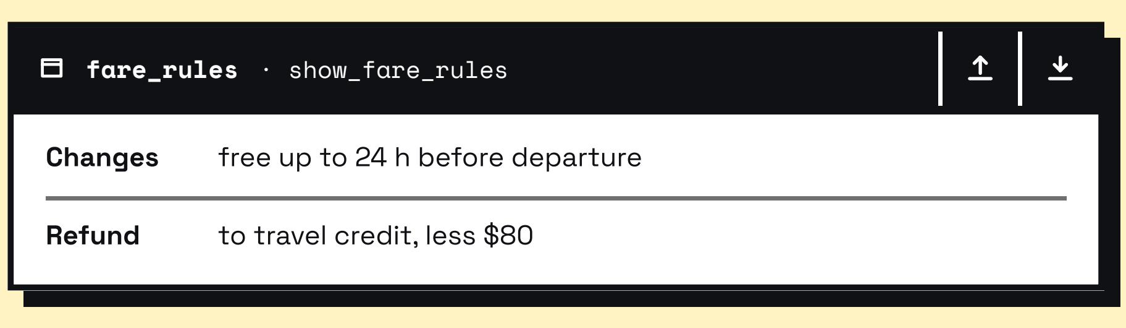


show_seat_map {"flight":"QF25"} — awaiting you

seat_map is in the dock

Docked, the surface leaves a 40px stub under its tool row: where it went, and Put back ⤒. The row keeps its status, so a question parked in the dock still reads amber here. While it's open the stub says "is open in a window".

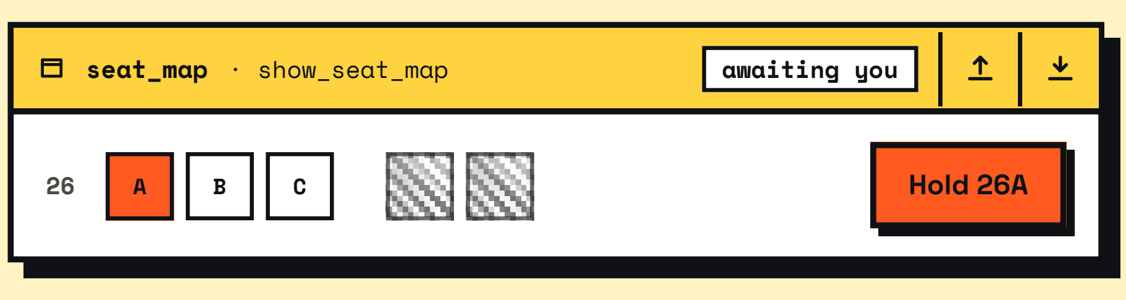
As a window



fare_rules · show_fare_rules

Changes	free up to 24 h before departure
Refund	to travel credit, less $80

open · raised on 8px 8px 0 --hai-line; title bar --hai-fg with --hai-panel text, like its dock item. Icons only: Remove from dock ⤒ puts the surface back in the chat where it was, and its item leaves the shelf; Dock ⤓ only closes the window.

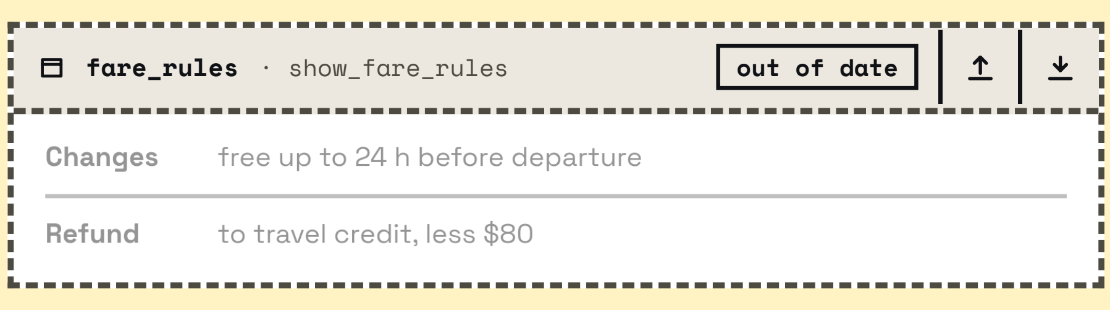


seat_map · show_seat_map — awaiting you

26 A B C

Hold 26A

awaiting you · an elicit surface keeps the amber title bar and badge of its tool row, wherever it is. Removed from the dock, it waits in the chat instead.

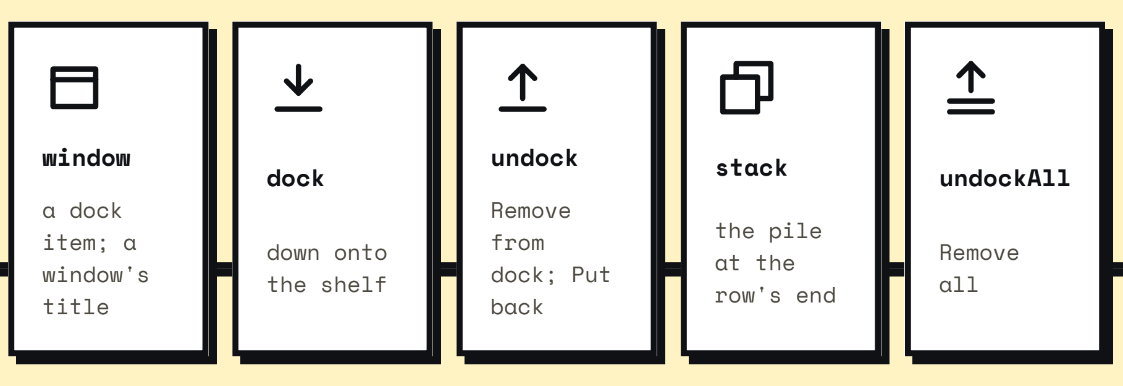


fare_rules · show_fare_rules — out of date

Changes	free up to 24 h before departure
Refund	to travel credit, less $80

out of date · the frame goes dashed and flat; its surface fades as it does in the transcript.

Icons



Icon	Use
window	a dock item; a window's title
dock	down onto the shelf
undock	Remove from dock; Put back
stack	the pile at the row's end
undockAll	Remove all

24×24, 2px stroke in currentColor, square corners like alert: five new paths for icons.js.

Tokens it uses

shelf	--hai-panel-2 · 3px --hai-line rule
item, stack	--hai-panel · 2px --hai-line · 3px 3px 0
open item, window bar	--hai-fg · --hai-panel
awaiting	--hai-warn · --hai-on-accent · --hai-accent
changed	--hai-accent
window, stack list	--hai-panel · 8px / 4px 0 --hai-line
bar, stub	--hai-panel-2 · --hai-dim · --hai-hover
